

Oxfordshire Student, MSc Adult Nursing, on her experience at RCN Congress 2019...

**"My first time as a voting member and second time attending - I found it a great experience. As a student it makes me excited to feel part of such an inspiring group of people. It was made even better because of the other members in the group who were really inclusive and friendly. I would love to go again."**

Clinical Lead, Abingdon EMU on her experience  
at RCN Congress 2019...

**"I really enjoyed RCN Congress. There was a great selection of fringe events and speakers, and I love voting. I always get reduced to tears seeing and hearing how passionate people can get about the job I love. It was great to see students so well represented and makes me realise the future of nursing is in good hands. I felt very supported by the branch and it was well organised."**

Oxfordshire Clinical Nurse Specialist in Eating Disorders on his experience at RCN Congress 2019...

**"The experience from start to finish exceeded any expectations I could have had. People had said that you reconnect with nurses and nursing at Congress and that is so much the case. Sat in the hall there was a wonderful sense of unity and possibility and to be part of that was so empowering."**

RGN/ In-house Trainer, Private Sector, on his experience at RCN Congress 2019...

**"I had the most amazing experience and brought home key takeaways on how the RCN can influence policy and health governance. I have met colleagues whom I became friends with and I was encouraged to be more engaged. I also met my fellow branch representatives who are so welcoming and supportive. I can't wait to experience more of what the RCN has to offer."**
